

FM80241

Filtration and Dispensing Tap Unit

Advanced filtration for commercial oils to the standards demanded by industries such as power generation.

Oils supplied in bulk fall short of the exceptional levels of cleanliness required by critical machinery such as generators. The CareTaker FM80241 oil dispensing and filtration unit is designed to fit standard 55 gallon (205 litre) drums. Maintains ISO cleanliness levels at or above industry standards.

Features and Benefits

- Modular design – easy to handle for transport.
- Color coded for oil type identification (optional).
- Color coded quick connect couplings (optional).
- 110–240 V pump and motor.
- Suction lance with breather.
- High quality Australian-made Filter Technology 2 micron depth filtration.
- Dispensing tap with drip tray.
- 16.5 ft suction and return hose.
- Kidney loop filtration function to maintain constant cleanliness.
- Wheels for maneuverability.
- Product labeling to suit your requirements.
